

ABSTRACT OF THE DISCLOSURE

An integrated management method for multimedia contents integratedly managing a plurality of multimedia players to replay multimedia files, with reference to file information of the multimedia files registered in a predetermined file information database (DB). The integrated management method includes activating a file search window in which a list of the multimedia files is displayed, and a file information registration window in which a list of the file information of the multimedia files is displayed. The integrated management method also includes registering the file information of the multimedia files in the file information DB by dragging and dropping the multimedia files displayed in the file search window to the file information registration window. Thus, provided are an integrated management method and an integrated management system for multimedia contents enabling file information of a multimedia file to be conveniently registered through the integrated manager for the multimedia contents.
